### **DETAILED ACTION**

Page 2

#### Election/Restrictions

- 1. Applicant's election of Group I, Claims 4-6 in the reply filed on 9-6-06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
- 2. Claims 7-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Chung (US4082180).

Chung teaches a motorized roller comprising: a roller body 20,30 of the motorized roller; a motor 46 disposed inside the roller body 20,30; a reducer 40 which is disposed inside the roller body 20,30, and reduces the rotation of the motor 46; and a rotor 112 which is disposed inside the roller body 20,30, and connected with the reducer 40 and the roller body 20,30 to transmit power of the reducer 40 to the roller body 20,30; wherein the roller body 20,30

Page 3

Art Unit: 3726

comprises a first roller body 20 and a second roller body 30, and the first roller body 20 and the second roller body 30 is connected at a power transmission section (above reference numeral 32 in figure 2) between the rotor 112 and the roller body 20,30. See mark-up of figure 2 below for what is considered a "power transmission section", similar to figure 3(A) of the instant invention where reference character "x" defines a "power transmission section".

Art Unit: 3726

5. Claims 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Fannin et al.

(US6447336).

Fannin et al. teach a motor 82, reducer 84, a rotor 89, wherein the roller body comprises a first roller body 104 and a second roller body 88 connected at a power transmission section between the rotor and the roller body.

The inner peripheral surfaces of the first roller body 88 and the second roller body 88 are connected to an outer peripheral surface of the rotor 89.

## Allowable Subject Matter

- 6. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc Jimenez whose telephone number is (571) 272-4530. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bryant can be reached on (571) 272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
